

ATTAPAPA INVENTORY & SALES WEB APP

System Behavior & Functional Overview (Updated with Role Control)

This document explains how the ATTAPAPA web application will behave, including strict role-based access control between the CEO (Admin) and Sales Staff.

1. GENERAL OVERVIEW

The ATTAPAPA web app is a **stock and sales management system** for foreign-used car headlights, taillights, fog lights, and boot lights.

The system will:

- Manage large inventory (10,000+ items)
 - Track sales (cash and credit)
 - Handle returns
 - Track debts (fair guys)
 - Support two branches
 - Enforce strict user permissions
-

2. USER ROLES (VERY IMPORTANT)

There are ONLY TWO roles:

1. CEO (Admin)

Full control of the system

2. Sales Staff

Limited access — ONLY allowed to record sales

3. CEO (ADMIN) PERMISSIONS

The CEO has full access to:

- Dashboard (all reports and analytics)
- Inventory (view, add, edit, delete products)
- Add Product
- Sales (view all transactions)
- Returns management
- Fair Guys (debtors management)
- Reports (financial and stock reports)
- Bulk Upload
- Settings
- Audit Logs
- Branch management

CEO can:

- Edit stock quantities
 - Edit product details
 - View all financial data
 - View all debts
 - Manage users
-

4. SALES STAFF PERMISSIONS (STRICT CONTROL)

Sales staff have VERY LIMITED access.

They can ONLY:

- Access the **Sales (Scan to Sell)** screen
- Search products
- Scan barcode
- Enter:
- Quantity
- Selling price (based on negotiation)
- Choose payment type:
- Cash
- Credit (Fair Guy)

They can ALSO:

- Select existing fair guy
- Add new fair guy (only basic details)

Sales Staff CANNOT:

- View dashboard
 - View reports
 - View total sales
 - Edit product details
 - Change stock manually
 - See profit or analytics
 - Delete anything
 - Edit past sales
-

5. LOGIN BEHAVIOR

CEO Login:

- Redirected to full dashboard

Sales Staff Login:

- Redirected directly to **Sales screen**
 - No access to sidebar menus except Sales
-

6. DASHBOARD (CEO ONLY)

Displays:

- Daily, Monthly, Yearly, All-time sales
 - Cash vs Credit sales
 - Total outstanding debts
 - Low stock alerts
 - Recent transactions
-

7. BRANCH SYSTEM

ATTAPAPA operates:

- Main Branch
- Second Branch

Behavior:

- Every product belongs to a branch
 - Every sale is tied to a branch
 - CEO can view:
 - Per-branch reports
 - Combined reports
-

8. INVENTORY SYSTEM (CEO ONLY)

Products include:

- Headlights
- Taillights
- Fog Lights
- Boot Lights

Each product contains:

- Car make, model, year
 - Type and side
 - Condition (Foreign Used)
 - Quantity
 - Images
-

9. BARCODE & QR CODE SYSTEM

Behavior:

- Each product will have BOTH:
 - Barcode (for fast scanning at sale)
 - QR Code (for detailed product reference)

QR CODE USAGE (VERY IMPORTANT)

Product QR Code:

- Generated automatically after product creation
- Encodes product details (ID, make, model, type, side)
- Printed and **stuck on each physical product**

Receipt QR Code:

- Every receipt must include a QR code
- QR code links to or encodes:
 - Product details
 - Transaction reference

Purpose:

- Quick verification of product
 - Easy lookup without typing
 - Professional, modern system
-

BULK PRINTING

- Print barcodes + QR codes together
 - Include serial numbers for physical arrangement
-

SMART MATCHING OPTION (RECOMMENDED)

System should also support:

"Scan & Confirm" Mode:

- Staff scans a barcode label
- System shows product
- Staff confirms before sticking

This prevents mistakes when attaching labels.

ADVANCED OPTION (OPTIONAL FUTURE)

- Print with product name (short form)
 - Print with side (L/R)
 - Print with branch code
-

10. ADD PRODUCT (SMART INPUT SYSTEM – CEO ONLY)

Goal:

Minimize typing and speed up product entry

Preloaded Data (VERY IMPORTANT):

System must include a **predefined database** of:

- Car makes (Toyota, Honda, etc.)
- Models (Corolla, Accord, etc.)
- Light types:
 - Headlight
 - Taillight
 - Fog Light
 - Boot Light
- Variants:
 - LED
 - Normal
 - Sports
 - Special types (e.g., LG, custom names)

Input Method:

- Use dropdowns instead of typing
- User selects:
 - Make → Model → Year
 - Type → Variant → Side

User only needs to:

- Select from dropdowns
- Upload images
- Enter quantity

Optional:

- Enter last known price (reference only)

Result:

- Faster input

- Consistent naming
 - No typing errors
-

11. SMART SEARCH SYSTEM (AUTO-SUGGEST)

Behavior:

- Search bar is always visible (top-right)
- As user types (e.g., "Toyota"):
- System shows **dropdown suggestions instantly**

Dropdown includes:

- All matching products
- Shows:
- Car make + model
- Type (Headlight, Taillight, etc.)
- Stock availability

Features:

- Click to select product
- View stock immediately
- Shows:
- "In Stock (500)" OR
- "Out of Stock"

Purpose:

- Fast lookup in busy environment
 - No need to type full names
-

12. SALES SYSTEM (SCAN TO SELL)

Main working screen for Sales Staff

Steps:

1. Scan barcode or search product
2. Product appears with stock info
3. Staff MUST enter:

4. Quantity

5. Selling price (MANDATORY)

Rule:

- Sale cannot proceed without price input
-

13. PAYMENT OPTIONS

Staff must select:

1. Cash

- Sale completes instantly

2. Credit (Fair Guy)

14. AFFAIR GUYS (DEBTORS SYSTEM)

When Credit is selected:

- Dropdown list appears

Options:

- Select existing fair guy
- Add new fair guy

New Fair Guy includes:

- Name
 - Phone
 - Location (optional)
 - Notes (optional)
-

15. DEBT TRACKING (CEO VIEW)

System records:

- Customer name
- Product sold
- Quantity
- Selling price
- Total owed
- Date

CEO can:

- View all debts
 - Record payments
 - Allow partial payments
 - Mark as paid
-

16. RETURNS SYSTEM (CEO ONLY)

Process:

- Select previous sale
- Enter return details

System will:

- Increase stock
 - Adjust financial records
 - Save return history
-

17. STOCK MANAGEMENT

Automatic behavior:

- Sale → reduces stock
- Return → increases stock

Alerts:

- Low stock notifications (CEO only)

18. BULK UPLOAD (CEO ONLY)

- Upload products via CSV
 - Preview before saving
-

19. REPORTS (CEO ONLY – WORLD-CLASS STANDARD)

The reporting system must be **premium, professional, and international standard**.

Sales Reports:

- Daily, Weekly, Monthly, Yearly sales
- Branch comparison
- Cash vs Credit
- Sales trends (charts)

Financial Reports:

- Total revenue
- Total credit given
- Payments received
- Outstanding debts

Inventory Reports:

- Stock levels
- Low stock alerts
- Fast/slow moving products

Export:

- PDF and Excel
-

20. AUDIT LOG (CEO ONLY)

Tracks:

- Who made a sale

- Who added product
 - Who processed return
-

21. USER EXPERIENCE (PREMIUM)

Design:

- Clean, modern, and simple
- Premium colors (deep blue, white, emerald accents)
- Smooth animations

Usage:

- CEO: full control and insights
 - Staff: fast and simple sales-only interface
-

22. BRANDING & LOGO CONCEPT (ATTAPAPA)

Logo Idea:

- Symbol: stylized car light beam
- Shape: circular or shield

Colors:

- Deep blue + bright white + optional gold/emerald

Style:

- Bold modern font
 - Clean and memorable
-

23. STOCK INTAKE MODE (NEW GOODS ARRIVAL)

Purpose:

To properly record and organize new stock when goods arrive.

Workflow:

1. User (CEO/Admin) selects "Stock Intake"
2. Choose branch
3. Add products (new or existing)

For NEW products:

- Enter full product details
- Upload images
- Save → system generates SKU + barcode

For EXISTING products:

- Search product
- Enter quantity being added
- (Optional) record purchase note

Optional (Advanced):

- Record estimated purchase cost per batch
- Attach supplier note

Output:

- Stock increases
- Intake log is saved for reference

24. RECEIPT PRINTING SYSTEM

Purpose:

Provide customers with proof of purchase

Behavior:

After every sale, system generates receipt

Receipt Includes:

- ATTAPAPA logo and name
- Branch name
- Date & time

- Product name
- Quantity
- Selling price
- Total amount
- Payment type (Cash / Credit)
- Affair Guy name (if credit)

QR CODE (VERY IMPORTANT):

- Each receipt must include a QR code
- QR code represents:
 - Product details
 - Transaction reference

Features:

- Print receipt (thermal printer)
 - Download as PDF
-

25. MOBILE COMPATIBILITY (SCAN USING PHONE)

Purpose:

Allow staff to use phones for scanning and selling.

Behavior:

- Web app must be mobile-responsive
- Use phone camera to scan barcode

Features:

- Camera-based barcode scanning
- Large buttons for easy tapping
- Fast load on mobile networks

Future:

- Dedicated mobile app (Android & iPhone)
-

26. UI DESIGN & SCREEN LAYOUT (VISUAL STRUCTURE)

Login Screen:

- Clean centered form
- ATTAPAPA logo at top
- Simple fields (email, password)

Dashboard (CEO):

- Top: key metrics cards
- Middle: charts
- Bottom: recent activity

Sales Screen (Staff):

- Large scan button / camera view
- Product display card
- Big input for price
- Quantity selector
- Cash / Credit toggle
- Affair Guy dropdown (if credit)
- "Complete Sale" button (very visible)

Inventory Screen:

- Table view of products
- Filters (make, model, type)
- Pagination for large data

Design Feel:

- Premium, clean, not crowded
- Deep blue + white + soft accents
- Smooth transitions

FINAL SUMMARY

This system ensures:

- Full CEO control

- Simple staff workflow
 - Flexible pricing
 - Proper debt tracking
 - Accurate barcode handling
 - Professional stock intake process
 - Receipt generation
 - Mobile-friendly usage
 - Premium, world-class experience
-

This is the final approved structure for ATTAPAPA web app.
